## GT 4.2 C Common Libraries : System Administrator's Guide

### Introduction

This guide contains advanced configuration information for system administrators working with C Common Libraries. It provides references to information on procedures typically performed by system administrators, including installation, configuring, deploying, and testing the installation.

### **Important**

This information is in addition to the basic Globus Toolkit prerequisite, overview, installation, security configuration instructions in the [Installing GT 4.2.1](#). Read through this guide before continuing!

6. Troubleshooting .....	6

---

# Chapter 1. Building and Installing

For instructions on building and installing GT 4.2, see the [Installation Guide](#).

---

# Chapter 2. Configuring

There is no configuration interface to the C common libraries.

---

# Chapter 3. Deploying

The C common libraries are available in any GT 4.2 installation.

---

# Chapter 4. Testing

The C common libraries test suite is included in the `globus_common_test` package.

---

# Chapter 5. Security Considerations

## 1. Security Considerations for C Common Libraries

There are no security considerations for the C Common Libraries.

---

# Chapter 6. Troubleshooting

The C common libraries are intended for use by developers; there are no user level troubleshooting techniques.
